Primary 3 / Grade 3

2021 SINGA Assessment - Primary 3

1. $6 + 6 + 6 + 6 + 6 + 6 + 6 = \underline{\hspace{2cm}} \times 6.$

What is the missing number in the blank?

2. $9 \text{ m } 3 \text{ cm} = \underline{\hspace{2cm}} \text{ cm}$

What is the missing number in the blank?

3. $608 \div 8 = \underline{\hspace{2cm}}.$

What is the missing number in the blank?

4.
$$\begin{array}{r} 3 \quad 0 \quad 0 \quad 7 \\ - 1 \quad 0 \quad \boxed{A} \quad 9 \\ \hline 1 \quad 9 \quad 1 \quad \boxed{A} \\ \hline \end{array}$$

5. What is the sum of 81 hundreds and 6 tens?

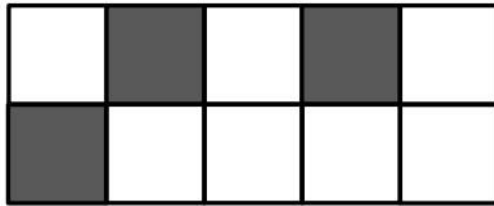

6. What is the missing number in the blank?

$35 \times 4 = 7 \times \underline{\hspace{2cm}}$

7. The figure stands for one whole.

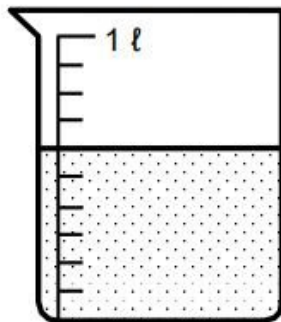

Bala wants to shade $\frac{1}{2}$ of the figure.

How many **more** part(s) must he shade?

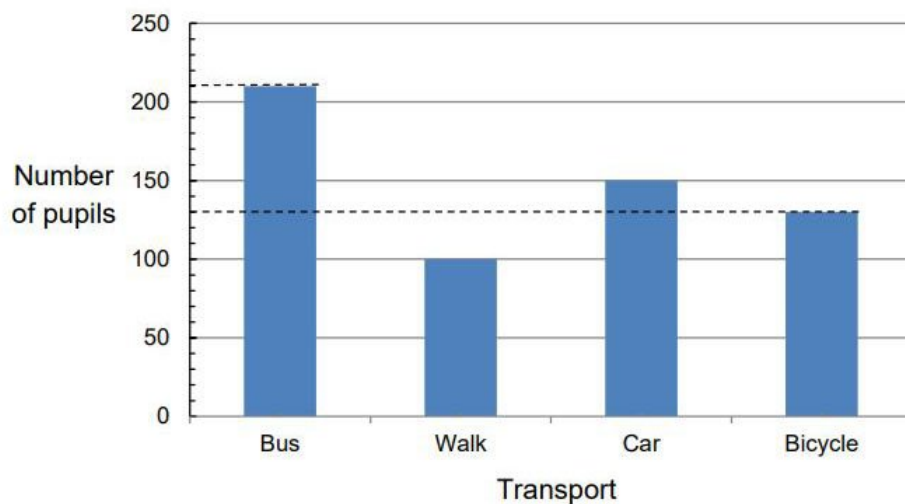

8. Look at the figure on the right.

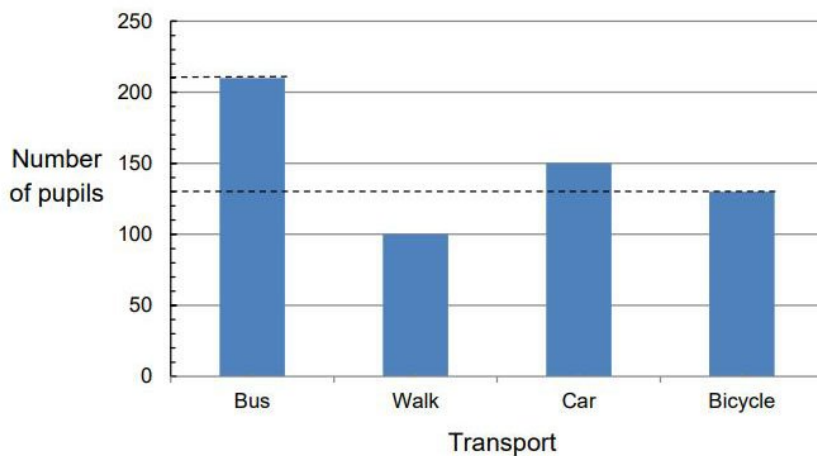

What is the volume of the water in the container?

9. The bar graph below shows the different modes of transport some pupils take to school.

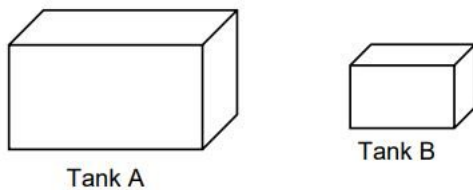

10. The bar graph below shows the different modes of transport some pupils take to school.

11. Find the missing number in the number pattern below.
2473 , 2623 , 2773 , _____ , 3073

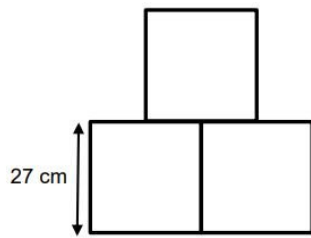

12. Use all the digits below to form the greatest 4-digit odd number.
4 , 7 , 9 , 6

13. Tank A can hold 4 times as much water as Tank B.
Tank B has a capacity of 500 ml.
How much more water can Tank A hold than Tank B?

14. Jane had 408 cookies.
She packed the cookies equally into 9 tins and had some cookies left.
How many cookies were left unpacked?

15. The figure below is made up of three identical squares.
Find the perimeter of the figure.

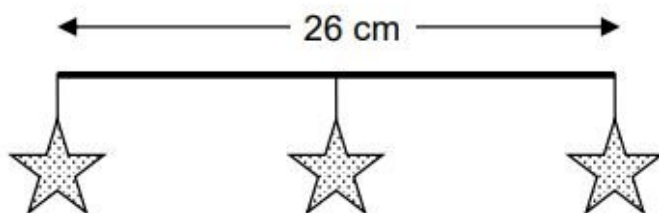

16. How many 5-cent coins can be exchanged with a \$10-note?

17. Ms Tan gave some sweets to her 28 students.
Each student received 3 sweets.
Ms Tan had 29 sweets left.
How many sweets did Ms Tan have at first?

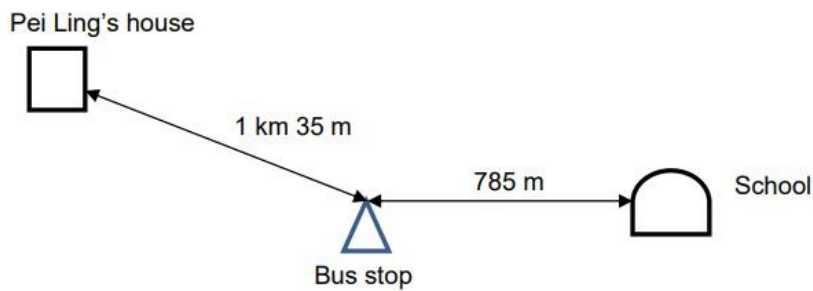

18. The picture below shows a section of a party decoration.
All the stars are placed equal distance apart.

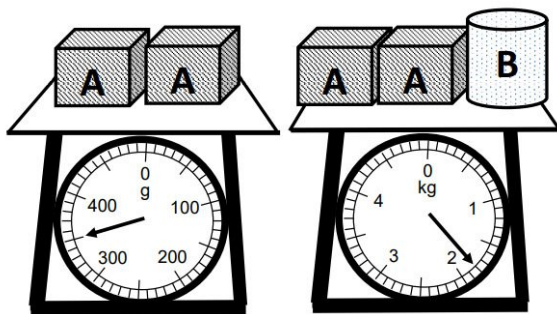

The distance between the first star and the third star is 26 cm.
What is the length between the first star and the sixth star?

19. Mark had 60 lollipops.
He had 3 times as many lollipops as James.
James had 28 lollipops fewer than Alvin.
How many lollipops did Alvin have?
20. Serene bought 3 identical storybooks and she had \$7 left.
If she were to buy 5 such storybooks, she would be short of \$23.
What was the cost of 1 such storybook?

21. Pei Ling walked from her house to her school.
She passed by a bus stop along the way.
What was the total distance she had travelled? Express your answer in metres.

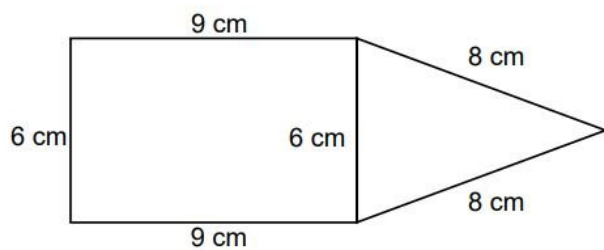

22. Study the weighing scales below. What is the mass of Object B?
(Leave your answer in g.)

23. 8 identical chairs are as heavy as 6 identical desks. The mass of each desk is 12 kg. What is the total mass of 1 such desk and 1 such chair?

24. Clarissa bought a bowl of noodles for \$8.85 and a drink for \$3.15. She gave the cashier three five-dollar notes. How much change should Clarissa receive?

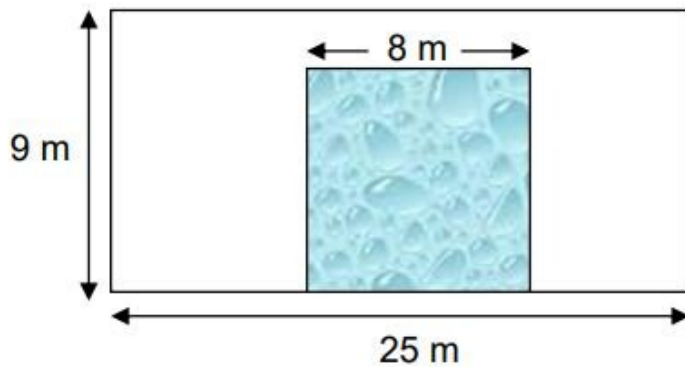

25. The figure below shows a rectangle and a triangle.
Find the perimeter of the figure.

26. The breadth of a rectangle is 70 m.
Its length is 12 m longer.
Find the perimeter of the rectangle.

27. A school hall measured 25 m by 9 m. An 8-m square design was drawn on the floor of the hall. What area of the hall was not covered by the drawing?

28. A baby crocodile is 75 cm long now. It grows by 7 cm every month. How many months from now will it grow to a length of 1 m 80 cm?

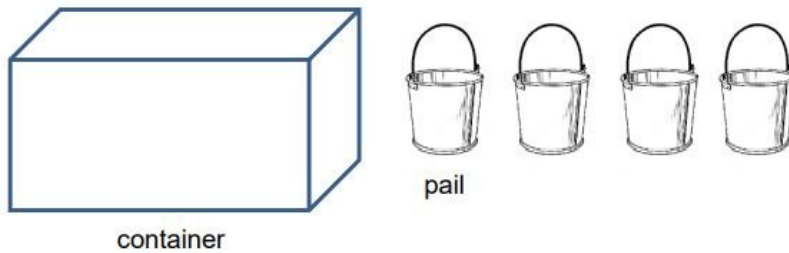

29. The table below shows the duration Aqilah took to complete her homework:

Subject	Start Time	End Time
Mathematics	2.35 p.m.	3.02 p.m.
Science	3.15 p.m.	4.00 p.m.
English	4.30 p.m.	5.10 p.m.

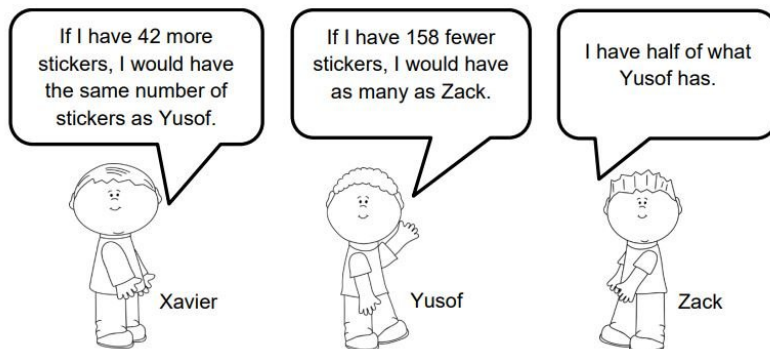

How many minutes did Aqilah take to complete all her homework?

30. A container was filled completely with 4779 mL of water.
4375 mL of water was poured out of the container.
The remaining amount left in the container was poured equally into 4 pails.
What was the volume of water in each pail?

31. A drink seller mixed 580 mL of orange syrup with 2040 mL of water to make orange juice. He poured the orange juice into a jug and had 920 mL of orange juice left.
What was the capacity of the jug?

32. Read the conversation below.
Find the total number of stickers the three boys have.

33. Uncle Ong bought some durians at \$7 each. He gave the fruit-seller \$100 and received \$37 change. How many durians did he buy?

34. A snack stall had a special offer as shown below.

 \$4.50 for a box of popcorns	 Buy 2 boxes of popcorns and get a can of drinks FREE!
--	---

Mr Chew gave his pupils a treat and spent \$252 on the popcorns.
How many cans of drinks did he receive for free?

35. What is the missing number in the box below?

$$\star + \star = \heartsuit$$

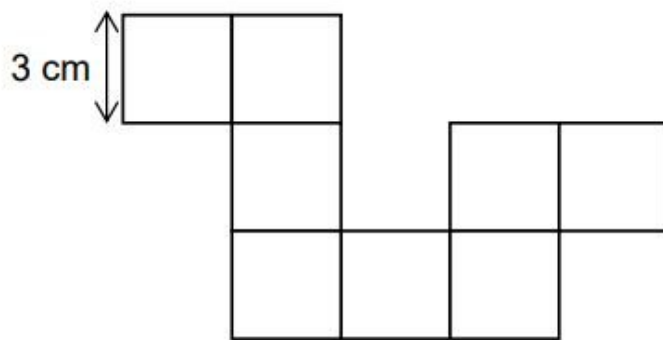

$$\star + \heartsuit = 387$$

$$\heartsuit = \boxed{?}$$

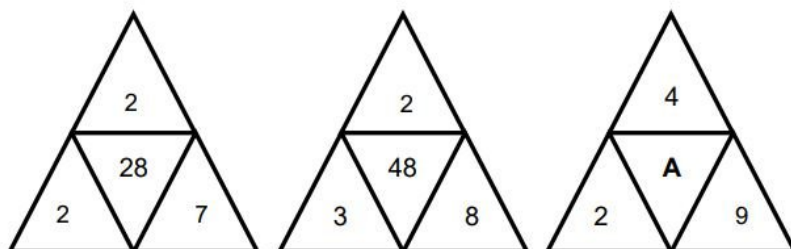

36. Sally left home at 10.45 a.m. to go to the library.
 She took 45 min to reach the library.
 She left the library at 4.30 p.m.
 How long did Sally stay in the library? Give your answer in minutes.

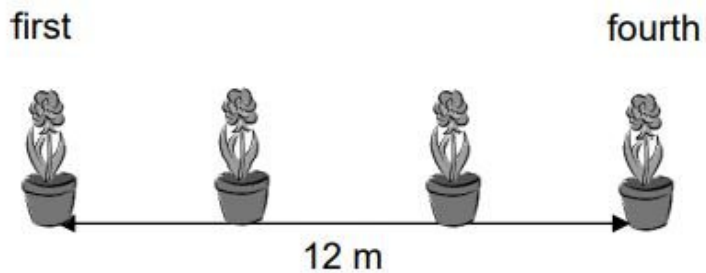

37. The figure below is made up of identical squares.
 What is the perimeter of the figure below?

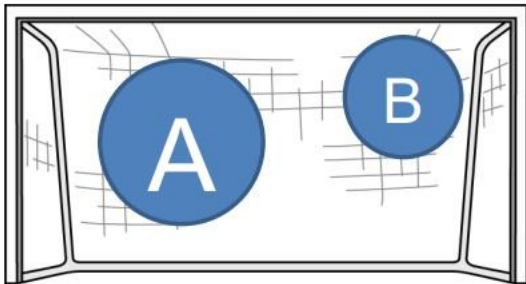

38. Look at the number pattern below. What is the value of A?

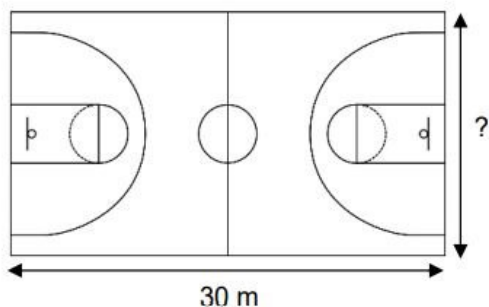

39. Some flower pots were placed at equal distance apart along a street.
 The distance between the first and the fourth flower pot was 12 m.
 The distance between the first and the last flower pot was 100 m.
 How many flower pots were there along the street altogether?

40. At a carnival, 2 points are scored if the ball is kicked into Hole A. 4 points are scored if the ball is kicked into Hole B. Ali kicked the ball 10 times into either of the holes and scored a total of 26 points. How many times did he kick the ball into Hole B?

41. Ben jogged around a rectangular basketball court twice.
 The total distance covered was 180 m.
 The length of the basketball court is 30 m.
 What is the breadth of the basketball court?

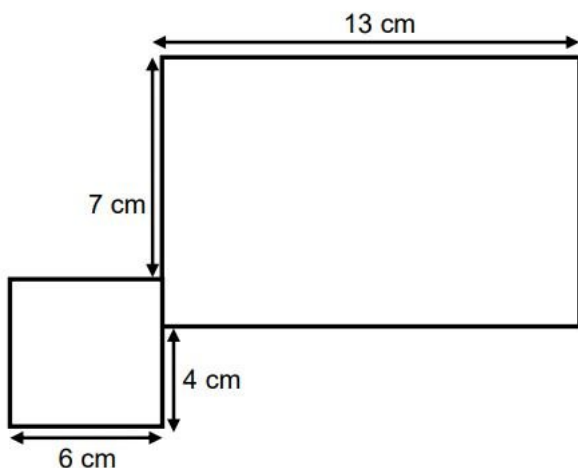

42. A fruit seller bought 6 boxes of pears.
Each box contained 160 pears.
He packed the pears into bags.
Each bag can hold up to 9 pears.
What is the least number of bags he needs to pack all the pears?

43. Luke spent \$138 on 3 toy robots and 3 game sets.
Each game set cost \$10 more than each toy robot.
How much would a game set cost?

44. The figure below is made up of a rectangle and a square of side 6 cm.
Find the area of the rectangle.

45. Nathan's savings is \$128 less than $\frac{3}{4}$ of Ian's savings.
Both of them have a total of \$1867 savings.
How much savings does Ian have?
